

Adobe Firefly - Presented by Jeremiah Long

The screenshot shows the Adobe Firefly website interface. At the top, there is a navigation bar with the Adobe Firefly logo and links for Home, Gallery, Favorites, About, and Help. On the right side of the navigation bar, there are icons for a gift, a chat bubble, and a button to "Join the Discord". Below the navigation bar is a large, vibrant image of a stone cottage in a lush forest. The cottage has a stone chimney and a window with a wooden frame. In the foreground, a small stream flows over rocks, and a stone path leads towards the cottage. The background features snow-capped mountains under a blue sky with clouds. Overlaid on the image is the text "Get creative with Adobe Firefly" in a large, white, bold font. Below this text is a dark grey bar containing the prompt "fantasy stone cottage in a spring forest aside a cobblestone path and a babbling brook. Stone wall." and a blue "Generate" button with a star icon.

Adobe Firefly - Transparent AI Training Data

Enhance the creative process.

The vision for Adobe Firefly is to help people expand upon their natural creativity. As both a product and an embedded model inside Adobe apps, Firefly offers generative AI tools made specifically for creative needs, use cases, and workflows.

Give creators practical advantages.

Trained on Adobe Stock images, openly licensed content, and public domain content, Firefly is designed to be safe for commercial use. To ensure that creators can benefit from generative AI, we've developed a compensation model for Adobe Stock contributors whose content is used in the dataset to retrain Firefly models.

Set the standard for responsibility.

Through efforts like the [Content Authenticity Initiative](#) and the [Coalition for Content Provenance and Authenticity](#), we're standing up for accountability, responsibility, and transparency in generative AI. We're working toward a universal "Do Not Train" Content Credentials tag that will remain associated with a piece of content wherever it's used, published, or stored.
